## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on March 1, 2004 has been entered.

### ***Drawings***

2. The drawings were received on January 7, 2004. These drawings are approved.

### ***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-8, 26, 41, 42, 44 and 50, drawn to calculating pixel value, classified in class 382, subclass 219.
  - II. Claims 9, 24, 32, 33, 35, 37, 38, 39, 43, 45, 46, 47 and 48, drawn to evaluating positional relation among candidates classified in class 382, subclass 291.
  - III. Claims 23, 27 and 49, drawn to density gradient calculation classified in class 382, subclass 169.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2625

4. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as evaluating positional relation among coordinates. See MPEP § 806.05(d).

5. Inventions III and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as density gradient calculation. See MPEP § 806.05(d).

6. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as evaluating positional relation among coordinates. See MPEP § 806.05(d).

7. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, the search for Group II is not required for group III and I, and the search for Group III is not required for Group II and II restriction for examination purposes as indicated is proper.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
